## Metadata Information and Links

Short Name	Description	Information URL
Scientific Name	Accepted scientific name for the taxon represented by the record	
Common Name	Accepted common name for the taxon represented by the record in this row.	
Synonyms	Alternative scientific names that might be applied to the taxon by other organizations.	
Statewide Occurrence	Occurrence of the species at a statewide scale.	
Statewide Origin	Origin of the species at a statewide scale.	
WYNDD Species of Concern	Species of Concern are species that are vulnerable (SOC), or potentially vulnerable (SOPC), to extirpation at the global or state level.	<a href="#">Click here</a>
WYNDD Wyoming Contribution Rank	The level that Wyoming populations of a taxon contribute to the rangewide persistence of that taxon.	<a href="#">Click here</a>
Heritage State Rank (S Rank)	Conservation-rank assigned to non-migratory taxa (binomial and trinomial) by biologists for a given state, province, or other conservation data center.	<a href="#">Click here</a>
Heritage Global Rank (G Rank)	Global binomial rank assigned by NatureServe: range-wide probability of extinction for a species.	<a href="#">Click here</a>
USFWS Endangered Species Act	The Endangered Species Act of 1973 directs the United States Fish and Wildlife Service (USFWS) to identify and protect rare plants and animals.	<a href="#">Click here</a>
BLM Wyoming Sensitive Species List	Sensitive species (those that could easily become endangered or extinct in the state) warranting special attention on BLM lands (excluding invertebrate species).	<a href="#">Click here</a>
USFS Sensitive Species List	USFS Region 2 and Region 4 have developed lists of "Sensitive Species" that warrant special attention on USFS lands. Sensitive species are defined as "plant and animal species identified by the Regional Forester for which population viability is a concern.	<a href="#">Click here</a>
USFS Species of Local Concern	Species of Local Concern in the designated National Forest/Grassland.	<a href="#">Click here</a>
WGFD Species of Greatest Conservation Need (SGCN)	Species ranked NSS1-NSS4 or NSSU are considered to be Species of Greatest Conservation Need (SGCN).	<a href="#">Click here</a>
Major Taxonomic Group	Major taxonomic group to which the taxon belongs.	
Minor Taxonomic Group	Minor taxonomic group to which the taxon belongs.

The Wyoming Species List is a web application created and maintained by the Wyoming Natural Diversity Database (WYNDD), at the University of Wyoming. The Species List application pulls information on the taxonomy and status of Wyoming species from WYNDD's central database. The Species List is updated on a weekly basis, to ensure that the information is current. Please visit <https://www.uwyo.edu/wyndd> for more information about WYNDD. If you have any questions about the Species List application, please email [support@wyndd.org](mailto:support@wyndd.org).
